

Isle of Wight Energy Plan

client: Isle of Wight Council.

client brief: Investigate sustainable technologies which can be employed to reduce CO₂ emissions from a new development.

our solution: Review and technical analysis of suitable renewable and low carbon technologies. Site energy strategy and business planning.

description: The Isle of Wight engaged Element Energy directors Ben Madden and Shane Slater to assist with the implementation of renewable energy projects on the Island. Based on an existing renewable energy audit, the work focused on development of a business plan to create a balanced renewables portfolio, to implement projects by maximising local benefit and to reduce attrition rates in the planning process.
